

Schubkurbeltriebwerk	Slide and crank mechanism
Synchronkoppelglied	Coupling link of or for synchroniser
Schenkwinkel	Angle of obliquity Angle of incident Leaning angle of apex seal relative to normal to bore
Laufdichtfläche	Primary or sliding seal area (high relative velocity)
Rutsdichtfläche	Secondary or drift seal (side of sealing element where there is only nominal movement)
Dichtbolzen	Sealing block, link-block of Wankel sealing grid
Dichtgrenze	Sealing boundary where sealing ends, occurs, is effected, sealing grid
Zweimaschinensatz	Machine consisting of two units, compression and expansion units
Zellenräder	Multi-vane rotors, pumps or compressors

* Most complicated, difficult to draw, not elaborated on in book
